Salt Lake City, UT*

WEATHER KEY POINTS

06/02/19 - 06/08/19

Sunday

- A chance of showers and thunderstorms will continue in the afternoon and evening, mainly over the Sierra and adjacent foothills, as well as the mountains and some inland valleys across Southern Region.
 - Locally heavy rainfall is possible with any thunderstorm that passes over an area.
 - Since winds above the surface will be quite light across Southern Region, any showers and thunderstorms that form will be slow moving, and could linger in any one location for an extended period of time.
 - This will lead to a threat of flash flooding Sunday afternoon and evening across the mountains of Santa Barbara and Ventura Counties, the Antelope Valley, the Cuyama Valley, and the mountains of Los Angeles County (excluding the Santa Monica Range).
 - Hail and strong, gusty winds may also be possible with isolated storms across Inland Region

Monday-Wednesday

- Heat-related impacts are possible across the Sacramento Valley starting Monday, then also spreading south into the San Joaquin Valley Tuesday and Wednesday
 - Moderate Heat Risk expected for those who are sensitive to heat, especially those without effective cooling and/or adequate hydration
- Isolated showers and thunderstorms continue to be possible, primarily over the Sierra, but in general a drying trend is expected across the state

Thursday-Saturday

- A cooling trend is expected across the state for Thursday-Friday, significantly reducing heat-related impacts
- Although isolated showers cannot be ruled out, dry conditions are expected across much of the state for the latter half of the week

CALIFORNIA WEATHER IMPACTS

06/02/19 - 06/08/19
